EDUCATION

B.SC Computer Science
Bowen University

09/2016 - 11/2020   *4.84/5.00 CGPA*
Grade
- First Class Honours (Best graduating student in both department and college)

WORK EXPERIENCE

Software Engineer (MERN STACK)
Punch Group

04/2022 - Present   *San Fransisco, California*
Achievements/Tasks
- Worked with the internal marketing app team to fix bugs and build new features into the app and successfully scheduled marketing newsletter emails to be sent to clients. (Technologies used: React, Nodejs, AWS).
- Built a feature to track and give insight of emails that have been sent, delivered, bounced, opened and even clicked using Nodejs, AWS SES, SQS, SNS.

Software Engineer
Camelcase Technologies

07/2021 - 04/2022   *Lagos, Nigeria*
Achievements/Tasks
- Built RESTful APIs to serve data to the frontend of a Loan / Savings application.
- Reconstructed an application frontend to a component-based structure to allow for efficient maintenance and also allow components to be reused.
- Created frontend components and views to consume data coming from an already existing backend service.
- Built static and dynamic websites for clients.

Contact : Mr Temitayo Bodunrin - 08028151478

Software Engineer
Providum

04/2019 - 02/2022   *Lagos, Nigeria*
Achievements/Tasks
- Worked with project managers to re-architect the Providum user dashboard, adding visualizations and improving the overall user experience.
- Using Next.js, I built a QR Code Scanner and Scheduler PWA to replace the existing Android app. This increased efficiency while reducing maintenance costs.
- Built RESTful APIs using Laravel 8 to serve data to the Javascript frontend.
- I partnered with a developer to build an internal dashboard to handle analytics of the Providum software using Laravel and Backpack.
